

Angela Maassen – Profile

Angela Maassen (Biomedical Engineer, born in 1968) worked for 17 years with an international medical technology company, e.g. as product developer, product manager and head of multi national teams, before initiating her personal change process. Since the year 2010 she accompanies and supports technical companies with change and key projects as consultant, moderator and coach.

„It is human beings who are the driving force to changes: for companies, projects and for themselves.“
